Please believe us when we say: **True quality needs no shout!**

When we started the company back in 2005, we wanted to manifest two things in our company's philosophy: we wanted to make evergreen designs that could create cool atmospheres in any kind of environment, now and for years to come. And we wanted to build a company known to deliver high quality products.

We have a contemporary design approach that secures intimacy and synergy with the surroundings. We evolve new evergreens with an industrial touch in dialogue with classic sustainable designs. The results are straightforward long-lasting and pure products with high functionality, a clear statement and a decorative impact.

We have committed ourselves to use only the best suppliers and manufacturers available. We strongly believe in traditional handcraft and skilled craftsmen and machine mass production does not fit our philosophy.

This is an ongoing search we have committed ourselves to as we only want to deliver the best lighting possible. Today we are proud that 95% of all parts used in our lamps are produced in Denmark. And we source within the EU when we cannot find what we need on the Danish market.

The high bar we have set in terms of our business philosophy reflects the high quality that we stand for. We have shipped tens of thousands of lamps since the company's inception and only a handful have returned due to malfunction or transportation issues.

Our design philosophy seems and feels right. Due to our close relationship to concept makers, architects, interior decorators, franchises owners and shop owners, we have helped open more than 300 outlets over the last couple of years, and we can honestly say: we have never missed a deadline!

We also develop site-specific design solutions and concepts for our customers. We offer a high level of flexibility and customization as we have control of all the aspects of the supply chain.

Our design and administration staff sits in our office in Charlottenlund in the outskirts of Copenhagen while our products are carefully assembled in our manufacturing site by our trained and trusted staff in Jutland.

ALL OUR OUTDOOR LAMPS HAVE BEEN DESIGNED
SPECIALLY TO RESIST THE DANISH TOUGH WEATHER

(Lots of rain, snow, wind and salty water).

CAREFULLY HAND-PAINTED WITH A VERY STRONG COATING
AND ASSEMBLED BY HAND IN DENMARK, OUR LAMPS WILL GO
THROUGHOUT YEARS NO MATTER THE WEATHER CONDITIONS.

True quality needs no shout!
