Peter Bowles & Charlie Bowles

WELCOME

Established in 1990 by Peter Bowles, Original BTC began life as an Oxford based home lighting brand and has secured two further lighting brands; heritage marine lighting manufacturer Davey Lighting and LED lighting manufacturer Beadlight, under its umbrella. Exports account for 50% of the production, supplying both the retail and contract markets around the world with an emphasis on the hotel, restaurant and aeronautical industries. With a family history steeped in retail, manufacturing and design, Peter designs the company's products in conjunction with his son Charlie who became Director in 2012.

Original BTC, Davey Lighting & Beadlight each offer a diverse and unique range of lighting designs. All brands draw inspiration from Britain's rich post industrialisation history as well as incorporating modern tastes and trends with our very latest innovative designs.

Quality, detail and an interesting mix of materials are integral to each brand's designs. These are created by using the best quality raw materials to their upmost capability, paying great attention to the concept and form. From using centuries old techniques to the very latest technology, all lights are handmade and manufactured in the UK. Six production facilities include a metalworks, glassworks, and a Stoke-on-Trent bone china factory rescued from closure in 2002. It is here where the lighting designs, whether crafted from versatile bone china, the finest aluminium, copper, brass and iron, come to life. The detailing of cotton braided cables, satin chromed bases & contrasting coloured shades make Original BTC, Davey Lighting and Beadlight's products uniquely distinctive and popular in Europe and beyond.

THE QUEEN'S AWARDS
FOR ENTERPRISE:
INTERNATIONAL TRADE

“

Winning a Queen's Award is a huge honour for the entire team – it's the highest accolade a company can receive in the UK. We've worked hard to produce high quality, well-designed, globally competitive lighting to show how successful British design and manufacturing can be.

PETER BOWLES

“

My goal was to design and produce lights that you are instantly at home with, that will fit easily and comfortably for many years to come.

PETER BOWLES

One of the first designers to capture the appeal of industrial styling, Original BTC founder Peter Bowles' relaxed, familiar lighting is driven by a family heritage of design steeped in manufacturing and business. A carpenter by trade, Peter's grandfather was chairman of Minty Furniture of Oxford, later bought out by Parker Knoll. After learning the ropes at Minty, Peter's father launched iconic 1960s lighting retailer Cosmo Designs, employing 13-year-old Peter on his stand at the Harrogate Lighting Fair.

Childhood visits to his father's manufacturing facilities opened Peter's eyes to the clean lines of traditional factory fittings and the versatility of mid-century style, while a stint working the machines at a French cutlery manufacturer ignited his passion in the “crash, bang, wallop of production.” Returning to England, Peter opened a Sheffield factory producing a million pieces of own-designed cutlery a year. Challenged by the design limitations of cutlery, in 1990 Peter went back to his roots with an Oxford-based lighting factory. “My goal was to design and produce lights that you are instantly at home with, that will fit easily and comfortably for many years to come,” he explains.

While inspiration is drawn from all quarters - an antique lamp used to keep chicks warm or the searchlight on the back of a toy lorry - authenticity and attention to detail remain at the heart of the collection. Peter has a passion for using raw materials to their best capabilities and creates a harmony of form and material. When a visit to the Stoke-on-Trent shade manufacturer revealed the factory was under threat of closure, Peter promptly took on the business, including all staff. Later, unsatisfied with the finish of commonly-used plastic lighting flex, he replaced it with woven cotton braid snipped off the family iron, soon becoming one of Original BTC's best-loved design features.

A unique figure in British manufacturing, Peter's repertoire includes launching new brands, rescuing struggling British heritage brands and factories as well as designing the group's products, all in conjunction with son Charlie who became Director in 2012.

In 2002, Peter Bowles saved a Stoke-on-Trent tableware manufacturer from closure, creating a new revenue stream for the factory as a producer of bone china light fittings. In 2010, the father-and-son team purchased Davey Lighting, a marine lighting manufacturer founded in East India Docks in the 1880s, preventing its sale to a Belgian company planning to outsource production to the Far East. Determined to produce all components for their two lighting brands on British soil, Peter and Charlie rescued a metalwork factory in Birmingham, also resulting in the launch of a new furniture brand, Bowles & Bowles. They then secured the future of English Antique Glass, the country's only remaining manufacturer of flat glass, used in stained glass windows at York Cathedral and Buckingham Palace. In early 2013, Oxford-based LED lighting manufacturer Beadlight joined their portfolio. Founded in the 1980s, Beadlight designed, engineered and manufactured the first ever low-heat, low-power, LED reading light for commercial aircraft. Only months later, the group's portfolio grew to six brands with the acquisition of 1945 pottery brand Branksome China which had recently ceased production.

MATERIALS

CERAMICS

With a passionate commitment to local manufacturing, where else to produce Original BTC's bone china lights than Stoke-on-Trent, the heart of the British ceramics industry.

For over three centuries, Stoke has been famed for its bone china tableware. Fascinated by the area's rich industrial history, Original BTC founder Peter Bowles set out to create a collection of Stoke-made bone china lights, manufactured according to tradition by the region's master craftspeople. Skill and expertise helped create a beautifully crafted collection of hand-cast translucent and versatile bone china lights.

The highly skilled, labour-intensive process begins with raw clay delivered on pallets to the factory. The clay is mixed with water to create slip, then poured into moulds. Once set, the moulds are split and the shade, base or ceiling rose is removed and left overnight to dry before being smoothed with sponges to remove any lines or imperfections. The items are biscuit fired then brushed once again. Finally, they are dipped in glaze then gloss fired for a natural white finish.

Today, the factory is Original BTC's lifeblood, producing the bone china components synonymous with many of its best-loved designs, including the Hector, Drop, Pembridge and Cosmo, and the latest creations; the Hatton, Fin and Cranton.

GLASSWORKS

Original BTC secured the future of English Antique Glass, the country's only remaining manufacturer of flat glass, in 2011. The specialised flat glass which is produced using artisanal techniques first developed in the twelfth century, is used in stained glass windows at impressive historical buildings, such as York Cathedral and Buckingham Palace.

The Birmingham based glassworks, also produces the glass for the groups light fittings, including Davey Lighting's Well Glass, Exterior Bracket and Pillar lights, and Original BTC's Globe pendants. Glass is mouth-blown using highly skilled labour and the time-intensive process resulting in glass of the finest colour, clarity and brilliance. Unlike homogenous mould-made glass, each piece is unique, with slight variations demonstrating the care and attention with which it is crafted. The seedy glass variety is achieved by adding a potato to the kiln.

METAL WORKS

Dedicated to constructing the beautifully unprocessed metal lighting designs on British soil, Original BTC's Birmingham based factory hand-forms, presses and stamps aluminium, copper and brass shades and bases from their original sheet metal state. The staff are craftspeople able to solder, weld and form to exacting standards. Based in the heart of the country's metal-working industry, the highly skilled workforce use centuries old techniques to produce Davey Lighting's truly authentic and classic lighting designs, some of which originate from East India Docks in the 1880s.

FP551N - Hatton 3 Pendant Light, Black Braided Cable

HATTON PENDANTS

Hatton Pendant Lights have intricately beautiful bone china shades. Using highly skilled & labour intensive processes, bone china has been transformed in to multifaceted, symmetrical, gem-like forms. When switched off the lights have an angular sculptural beauty, and when switched on they provide warm, ambient lighting with dramatic lines and shadows. The lights are available in 5 different shade designs. Each have a complementing faceted bone china ceiling rose, with a contrasting black cotton braided cable, providing a contemporary edge. For a truly iconic statement piece, choose one of the Grouping of Three or Triangular Grouping styles.

TITAN PENDANT LIGHTS

An original 1940s design, often seen in factories, offices, stations and industrial units of the period. The Titan range is made of Aluminium and is available in a choice of sizes and in a wide range of painted colours, with bronze, gold or white coloured interiors. The lights have an optional etched glass visor, which helps to diffuse light and reduce glare. All lights feature an Armour steel braided cable.

DP7243/LWH - Large Oceanic Pendant, White

7243 OCEANIC

A contemporary twist on an original design from the dockyards of early 20th Century Britain. The Oceanic's galvanised steel finish provides authenticity and longevity. The smart powder coated coloured shades complement the design and the light will create a strong industrial aesthetic in all interiors. The lights feature a galvanised cage cover.

FP610/AN/WE - Brompton, Size 1, Anthracite Glass

BROMPTON GLASS PENDANT

The Brompton combines simplicity with elegance. The smooth anthracite glass shade has a classical cylindrical shape, which is hand blown in our glass factory in England. Available in three sizes, the Brompton has a weathered brass ceiling rose and attractive chrome detailing on the cord grip. Pair it with our squirrel cage light bulb, to create an enhancing and illuminating glow.

DP8200/M/CL/BR - Glass School Pendant Light, Size 2, Clear and Brass

GLASS SCHOOL PENDANT LIGHT

Davey Lighting’s iconic School Light form has been repurposed in anthracite, opal and clear glass, giving the classic design a new and fresh dimension. Now available in two sizes, each glass shade is hand blown in our glass factory, and fitted with an attractive brass or weathered brass chain and ceiling rose. The anthracite and clear glass shades show off the filament exposed light bulb.

DP8165/AN/BR - Glass York Pendant ,Size 1, Anthracite and Brass

GLASS YORK PENDANT

The York Pendant is one of Davey Lighting’s latest designs, taking inspiration from Davey’s traditional ‘spun reflectors’. Available in two sizes, the hand blown glass shades come in a range of muted colours. The clear or anthracite glass shades allow the filament exposed light bulb to be seen, creating a dramatic effect when lit. Choose the opal glass shade for a more diffused and softer illumination. Each light has a complementing brass or weathered brass chain detailing and ceiling rose.

DP8300/M/OP/WE - Hampton Pendant, Size 2, Opal and Weathered Brass

HAMPTON PENDANT

The Hampton Pendant Light has been hand made using an original blend of prime materials and finishes. Taking inspiration from marine naval ships, the lights have been created using specialist techniques. Opal glass has been hand blown to create a classic light, whilst the addition of ceramic and weathered brass fittings, provide an individual touch. IP rated, the Hampton will hang comfortably in any interior, including bathrooms and exterior porches and hallways.

FW595N - Oxford 2 Bone China Pitched Wall Light

OXFORD

The Oxford Wall Light encompasses Original BTC's notable skill of creating new and diverse forms out of bone china. The quilted bone china shade not only exudes quality, but when lit, it creates an interesting and rich tonal illumination, as the light interacts with the shade's surface. Handmade in Stoke-on-Trent, the smooth, contemporary bone china base complements the style, making it an attractive option for hallways, bedrooms and kitchens. Choose between a pitched or conical style, depending on the space-the wider pitched shade is more open with a larger light spread, whilst the conical option offers a concentrated direct down light source.

FIN

The Fin Wall Light is the latest addition to the popular Fin Collection. Handmade in Stoke-on-Trent, the distinctive bone china shade is angled on to a satin chrome stem and base, with a toggle switch.

FW317N - Hector Medium Dome Wall Light, Natural

HECTOR DOME

A British design classic in translucent bone china, the Hector Dome Wall Light has a positionable shade and a smart cotton braided cable. It provides stylish and practical, space-saving ambient lighting. Available in a range of mounting options to accommodate a variety of installations, choose between the standard Wall and Switched Wall for hard-wired solutions, or the Clip and PSC (Plug, Switch & Cable) fittings where hard wiring is not feasible and greater flexibility is required.

For a variation on the dome shape, select the pretty Pleat or straight-sided Flowerpot. Hector Dome and Pleat Wall lights are available in natural, blue or green bone china, with matching wall plate (Flowerpot: Natural only) and cotton braided cable. Hector Switched Wall fittings now feature a powder coated white metal wall plate, designed to further enhance the longevity of the product.

FW545N - Portable Medium Pleat Wall Light, Sand and Taupe Braided Cable

PORTABLE PLEAT

The Portable Pleat is our most flexible wall light. A pleated bone china shade is held to the wall by a polished chromed round wall fixing. Available in two shade sizes, the light has 2.5 metres of cotton braided cable with an inline switch and plug. This allows for the light to be positioned anywhere, without needing hard wiring.

STIRRUP SIZE 1, 2 & 3 WALL LIGHTS

Inspired by the searchlight on the back of a toy lorry, the Stirrup collection is the ultimate in industrial chic. The wall lights have flexible, positionable aluminium shades and are available in 3 sizes. Sizes 2 & 3 have a frosted glass visor to prevent glare and provide a softer, more diffused light. The lights come in white, black and natural aluminium.

BE/CIR/WM/GL/PL/BE - Cirrus Wall Light, Gold Plated with Beige Leather

BEADLIGHT

WALL LIGHTS

Beadlight

Beadlight’s premium engineering has created an exquisite collection of LED Wall Lights of the highest quality. Using the latest LED technologies, the lights are elegant in design, whilst providing practical, flexible space-saving lighting. Choose between the Cirrus, Jet Stream, Maestro, Nimbus, Wand or Zonda styles in a range of colours and finishes. The wall lights are available in a selection of mounting options including Wall mounted, Surface mounted, Escutcheon, Through the Bedhead and Over the Bedhead fixings. The wall mounted version includes an integral driver inside the base plate, the other options are all low voltage (12VDC) fittings, requiring a driver for installing on a Mains voltage circuit. This driver should be installed remotely in a suitable enclosure behind the fitting.

FIXING OPTIONS:

<div>THROUGH THE BED HEAD</div> <div>The light is fixed through an aperture in the bead head board which is held in place by a nut, secured from the back of the bed head. This is a low voltage (12VDC) fitting and requires a driver.</div>	
<div>THE OVER THE BED HEAD</div> <div>The light is fixed by a bracket to the rear of the bed head board and curls over the top of it. This is a low voltage (12VDC) fitting, which requires a driver.</div>	
<div>ESCUTCHEON</div> <div>The Escutcheon Light is a surface mounted fitting that requires space behind the back plate to accommodate the luminaire cable and make electrical connection to the supply. This is a low voltage (12VDC) fitting and requires a driver.</div>	
<div>WALL MOUNT</div> <div>The Wall Mounted version fixes directly to a wall. The base plate contains an integral driver allowing direct connection to 240 V AC, the connection is made inside the base plate.</div>

BEADLIGHT COMPACT LIGHTS

Beadlight Compact Lights incorporate high quality LEDs, which combine a concentrated light output with low energy consumption, making them very efficient and the perfect solution for focused task lighting- particularly useful for discrete night time reading. The lights have a warm colour tone as standard. When the lights are pressed, the light opens and the upper part pivots away from the surface and then ‘swivels’ from side to side, to obtain the desired reading position. The lights are designed to sit flush when in the ‘off’ position.

All of the compact lights in the range are low voltage (12V) fittings, requiring a driver for installing on a mains voltage circuit. The driver should be installed remotely, in a suitable enclosure behind the fitting. With the exception of the Vortex (which is surface mounted), all of the products in the range need to be recessed, requiring access to the rear of the installation surface to complete installation. The lights listed below are shown with an outer bezel (they are also available without a bezel if required) and the projections are maximum measurements, rather than standard.

FW591N - Minster 1 Prismatic Wall Light

MINSTER

The Minster combines two of Original BTC's trademark materials: glass and ceramic. Utitarian in design, the attractive prismatic glass shade and hand moulded bone china base, will complement any interior setting. Choose between a pitched or conical style, depending on the space-the wider pitched shade is more open with a larger light spread, whilst the conical option offers a concentrated direct down light source.

DP8200/S/BRKT/AN/WE - Glass School Wall Light, Size 1, Anthracite and Weathered Brass

GLASS SCHOOL WALL LIGHT

A smaller version of Davey Lighting’s classic School Light, produced in hand blown glass, and designed as a compact wall light fitting. The glass shades come in either opal, anthracite and clear glass, with a weathered brass arm and back plate. The anthracite and clear glass shades show off the filament exposed light bulb.

DP8165/BRKT/OP/WE - Glass York Wall Light, Size 1, Opal and Weathered Brass

GLASS YORK WALL LIGHT

The York Wall Light is one of Davey Lighting's latest designs. Inspired by Davey's best selling 'spun reflector', the York is produced in hand blown glass, and designed as a compact wall light fitting. The glass shades come in either opal, anthracite and clear glass, with a weathered brass arm and back plate. The clear or anthracite glass shades allow the filament exposed light bulb to be seen, creating a dramatic effect, whilst the opal shade provides a more diffused illumination.

DP8300/S/BRKT/OP/WE - Hampton Wall Light, Size 1, Opal and Weathered Brass

HAMPTON WALL LIGHT

The Hampton Wall Light has been hand made using an original blend of prime materials and finishes. Taking inspiration from marine naval ships, the lights have been created using specialist techniques. Opal glass has been hand blown to create a classic light, whilst the addition of ceramic and weathered brass fittings, provide an individual touch. IP rated, the Hampton will sit comfortably in any interior, including bathrooms and exterior porches and hallways.

PILLAR LIGHTS

A classic wall light, recently updated to include a dimmable warm tone LED lamp. The Pillar lights are reminiscent of the Art Deco era, while maintaining a contemporary form, making them well suited to a variety of interior schemes, working particularly well in bathrooms. The three different curved profiles, consist of solid glass rods, finished with Brass end caps, available in Polished, Weathered or Chrome plated finishes.

BOX LIGHTS

Davey Lighting's iconic brass Lantern Wall Lights are suitable for indoor and outdoor use. Originally designed to illuminate exterior areas, the lights are now equally at home in interior settings such as in bathrooms and hallways, as they are lighting front doors and external walls.

The decorative box wall lights, are available in a variety of sizes, with different finishes, including polished brass, weathered brass, polished nickel and satin nickel. Some of the lights have glass that has been fixed internally, so that it sits inside the brass frame, whilst others are externally glazed, which has been applied to the outside of the frame with brass beading.

DP7641/BR/WE/CL - Box Wall, Externally Glazed, Small, Weathered Brass, Clear

7641, 7642 & 7649 BOX EXTERNALLY GLAZED

Handmade box wall lights in brass, with a weathered finish. Glass panels with brass beaded frames applied externally to three sides. Removable pins at each side allow access for changing the bulb. 7641 is a smaller size than 7642.

MAST LIGHTS

The Mast Light is a timeless design from the mid 20th century. Originally a mast-mounted fitting designed for illuminating yacht decks, the light's profile ensured rigging lines were not snagged. An attractive accent light to illuminate spaces and features, indoors and out, particularly around porches, kitchens and bathrooms.

DP0751/GM/PO - Mast Light, Polished Bronze

0749 LED MAST LIGHT

The 0749 LED Mast Light has been especially adapted to allow for an easy connection to a mains voltage circuit without a transformer, by incorporating a high quality LED warm tone lamp, with a GU10 base. The installation requires a void or recess behind the fitting to make a connection to the supply. Where this is not possible- a masonry wall for example, a matching back box is available (code 0760) providing a suitable housing for making a connection. The supplied LED lamp, has a comparable light output to a typical 35W Halogen, but draws considerably less power (5.3W), saving significant amounts of energy. The lifespan of the lamp is rated at over 40,000 hours. Cast in bronze or aluminium, with several finishes; Anodised (Aluminium only), Polished, Weathered (Bronze only) or Sandblasted.

0751 MARINE MAST LIGHT

The 0751 Marine Mast Light is a low voltage (12V) fitting, which requires a low voltage halogen transformer, that is not supplied and must be installed remotely. A variety of lighting effects can be achieved, from pin point to a soft wash dependant on lamp beam spread. Cast in bronze or aluminium, with several finishes; Anodised (Aluminium only), Polished, Weathered (Bronze only) or Sandblasted. Surface Mounted fitting, rear cable exit.

0750 MAST LIGHT, CAST WALL TRANSFORMER BOX

The 0750 Mast Light includes a transformer, housed in a matching cast transformer box, to allow connection to a main voltage circuit, directly behind the fitting. A variety of lighting effects can be achieved, from pin point to a soft wash dependant on lamp beam spread. Cast in bronze or aluminium, with several finishes; Anodised (Aluminium only), Polished, Weathered (Bronze only) or Sandblasted. The cast wall plaque can either be mounted on the surface or it can be recessed into the wall. Rear cable entry.

EXTERIOR BRACKET LIGHTS

Davey Lighting's Exterior Bracket Lights have a classic, continental style well glass fitting. This attractive range of wall lights have a clean design and suit both traditional and modern locations. Crafted out of galvanised iron or raw sand blasted bronze, the lights have a heavy cast construction. The wall lights are available with a standard right angle arm, swan neck or in the French style 'canted' version. Mounted either on a round backplate or on a corner fork.

7677 BRACKET LIGHTS

The 7677 style of Exterior Bracket lights have a reflector and either a right angle or swan neck arm. The lights have different wattages and are available in galvanised or black, with a corner fork or a round base. Galvanised guard sold separately. Galvanising is a traditional method of zinc plating steel and iron to protect it from weathering. It results in an unprocessed finish, that can leave rough areas on the surface. When painted, these areas are retained, meaning the finish will not be consistently smooth.

DP7203/BR/CL/E27 - Ship's Companionway with Guard

FC561 - Sopra Downlight (Ridged)

SOPRA DOWNLIGHT

Our Sopra range elevates the humble recessed downlight into a unique decorative feature. Particularly effective for small interiors with low ceilings, this collection provides a great alternative to larger ceiling lights and pendants. The range is available in three textural finishes – quilted, ridged and plain – all enhancing the translucent qualities of the bone china.

WHITBY LED SPOTLIGHTS

Introducing the new Whitby collection, our first range of spotlights with an LED light source. A functional design, with a swivel base and adjustable knuckle joint (beam angle of 36° spot, 7W). Combined with its anti-glare technology and LED, the Whitby offers an effective, discrete source of spot lighting.

0764, 0765 & 0766 SPOTLIGHTS WITH SHADE

Available in configurations of two, three and four and in a weathered brass finish. The lights feature Davey Lighting's classic spotlight design mounted on a matching metal backplate, housing the transformer. Ideal for horizontal or vertical use on ceilings or walls. The Spotlights have a swivel head and an adjustable knuckle joint for directing light just where you need it, with an anti-glare bar over the bulb ensuring a soft glow. Lamps are included and are available in either a narrow spot (8 degrees) or a wider beam (24 degrees).
